TATTOO EQUIPMENT AND PROCEDURES

TATTOO PLIERS

Holds standard digits, they are strong, light-weight aluminium alloy.

TATTOO LETTERS

Nickle-plated steel needles set in fibreglass reinforced nylon base.

Sharp!!

Available in letters, numbers and characters.

TATTOO INKS

Produces crisp, permanent tattoos. Green recommended for dark coloured skin. Black is recommended for a lighter coloured skin.

Crayons Raidex:
We stock all colours listed.

TATTOO PROCEDURES

1. Clean inside of the ear
2. Position pins of the tattoo letters
3. The black pad on the tattoo pliers should be BEHIND the ear.
4. Press the pliers firmly so that pins pierce the skin
5. Put away the pliers and apply ink to the inside of the ear
6. Rub in the ink with your thumb and leave to dry
8. **DO NOT** ever use any ink on the pliers!
9. **DO NOT** use a toothbrush to try and get ink in deeper
10. **DO NOT** wipe the ear with a cloth after tattooing
11. Excess ink will disappear in a week or 2
