Animal Health Products

— Est. 1985 —

Acidbuf is a buffer derived from calcified seaweed, which neutralizes excess acid leading to a more stable and productive digestive environment.

Features

- **Acidbuf** maintains rumen PH at optimal levels of 5,8 - 6,2.
 - Reducing the risk of acidosis.
 - Improve rumen metabolism.
 - Enhance animal performance.
- **Acidbuf** has a high acid absorbency in the pH range of 5,5 - 7.
 - Absorbs more than twice the level of acid than Sodium Bicarbonate.
 - Buffers the rumen up to four times longer than Sodium Bicarbonate.
- Contains Calcium (30%), Magnesium (5.5%) and other minerals.
- Highly effective in both sheep and beef diets.

Packaging

- 25 kg bag.
- Fine light grey powder.

DAIRY

- Improves rumen environment which could lead to better feed digestion.
- Acts as a buffer; thereby reducing the risk of rumen acidosis.
- Improves milk production as well as milk solids.
- Efficient in both TMR and pasture based feeding systems.
- **Recommended inclusion levels: 50 - 80 g/h/d.**

FEEDLOT

- Acts as a buffer, thereby reducing the risk of rumen acidosis.
- Reduces rumen wall damage.
- Improves rumen environment which could lead to better feed digestion.
- Could replace monensin as a natural alternative in beef feedlots.
- **Recommended inclusion levels: Beef: 50 - 60 g/h/d, Sheep: 7 - 10 g/h/d.**

SHEEP ON CROP RESIDUES

- Acts as a long term rumen buffer to protect sheep against rumen acidosis.
- Especially important if sheep on crop residues don't consume the buffer containing lick on a daily basis, thereby increasing the risk of acidosis.
- Can also be used as a treatment for sheep suffering from rumen acidosis.
- **Recommended inclusion levels: 10 g/h/d.**

PIGS

- Reduces the risk of gastric ulcers.
- Provides the opportunity to feed either pelleted or meal based diets.
- Improves feed efficiency when changed from a meal based diet to a pelleted diet.
- Decreases aggressive behavior in pigs e.g. tail biting.
- **Recommended inclusion levels: 4 - 6 kg Acidbuf / ton feed.**
